SUMMARY

Odoo and Python developer focused on production ERP systems — payroll and labor costing, HR request/clearance flows, expense and petty-cash operations, and shared mobile/hub APIs. Publishes installable Odoo modules and ships full products end to end (Odoo backend + Next.js).

PROFESSIONAL EXPERIENCE

Odoo Developer
Feb 2026 — Present

El Race Cons. & Gen. Cont. Co. LLC · Al Ain · On-site

- Own production Odoo workflows for payroll, labor costing, HR clearance, and IT hardware across day-to-day operations.
- Designed petty-cash and expense approval flows with project/city governance to keep ops-finance controlled and auditable.
- Maintain the shared mobile/hub REST layer (auth, HR, projects, requests) used by internal clients.

Developer
Jul 2025 — Jan 2026

Rons Enviro Care LLC · Ras Al Khor · On-site

- Delivered internal business systems and operational tooling for company workflows.
- Supported delivery with data analysis and process tooling used by operations teams.

Odoo Developer
Sep 2022 — Apr 2024

Myanmar Information Technology

- Delivered customized Odoo modules for workshop fleet and hotel management clients.
- Implemented backend logic in Python with PostgreSQL; built operational reports in XML, JavaScript, and QWeb.

Developer Intern
Jul 2022 — Aug 2022

Myanmar Information Technology

- Customized Odoo modules on live client projects — features, fixes, and delivery documentation.

IT Support Specialist
Feb 2021 — May 2022

Kangle (Kyan Sit Min)

- Handled hardware, software, and network support for daily operations; supported marketing with digital tooling.

SELECTED WORK

- hr_ops_suite (Odoo 18) — published on the Odoo Apps Store; employee transfer, IT hardware & clearance with approvals, checklists, and PDF reports. GitHub: github.com/devShine3/hr-ops-suite
- Lann Pya (lannpya.site) — live Odoo content/backend + Next.js front end for Myanmar youth guides in the UAE.
- Enterprise Odoo (private) — production payroll & labor costing, HR request/clearance platform, batch petty-cash/expense ops, and central mobile/hub REST APIs.
- Shineworkshop — earlier Odoo modules for workshop fleet tracking (Python models, XML views, PostgreSQL).
